

## **EXIT OPTIONS**

### THE PROS AND CONS

11/5/2024

#### TWO GENERAL CATEGORIES FOR PRIVATE OWNERSHIP TRANSITION

INSIDE	OUTSIDE
<ul> <li>Intergenerational transfer</li> <li>Management buy out</li> <li>Sale to existing partners</li> <li>Sale to employees</li> </ul>	<ul> <li>Sale to third party</li> <li>Recapitalization</li> <li>IPO</li> <li>Orderly liquidation</li> </ul>

#### **INTERGENERATIONAL TRANSFER**

An intergenerational transfer is the transfer of business stock to direct heirs, usually children. 50% of business owners want to exercise this option. In reality, only about 30% actually do so.

PROS	CONS
<ul> <li>Business legacy preservation</li> <li>Planned</li> <li>Lower cost</li> <li>More control</li> <li>Less disruption</li> <li>High buyer/seller motivation</li> </ul>	<ul> <li>Family dynamics</li> <li>Illiquid buyers/lack of funds</li> <li>Lower sale price</li> <li>Key employee flight risk</li> <li>Tradition may outstrip good strategy</li> <li>Path of least resistance - not always a path to growth or success</li> </ul>

#### **MANAGEMENT BUY OUT (MBO)**

In an MBO, an owner sells all or part of the business to the company's management team. Management uses the assets of the business to finance a significant portion of the purchase price.

PROS	CONS
<ul> <li>Continuity</li> <li>Highly motivated buyers (pent-up desire)</li> <li>Preserves key human capital/knowledge</li> <li>Planned</li> <li>Can be combined with private equity to access additional capital and resources for growth</li> </ul>	<ul> <li>Management "sand-bagging"</li> <li>Distraction</li> <li>Threat of flight (coercion of owner)</li> <li>Illiquid buyers</li> <li>Lower price and unattractive deal terms for seller</li> <li>Heavy seller financing introduces risk</li> </ul>

#### **SALE TO EXISTING PARTNERS**

In a sale to existing partners, success is closely linked to the existence and quality of a buy-sell agreement. This is not an option for single-owner businesses.

PROS	CONS
<ul> <li>Less disruptive</li> <li>Planned</li> <li>Well-informed buyers</li> <li>Controlled processes <ul> <li>If buy-sell agreement is in place and funded</li> </ul> </li> <li>Lower cost</li> </ul>	<ul> <li>Lower sales price</li> <li>Potential discord</li> <li>Competency gaps?</li> <li>Buy/sell may restrict selling options</li> <li>Realization of proceeds from sale is often lower (and less)</li> </ul>

#### SALE TO EMPLOYEES (ESOP)

In a sale to employees, a company uses borrowed funds to acquire shares from the owner and contributes the shares to a trust on behalf of the employees.

PROS	CONS
<ul> <li>Business stays in the "extended family"</li> <li>Shares purchased with pre-tax dollars by the ESOP</li> <li>Taxable gain on the shares sold to the ESOP by the owner may sometimes be deferred</li> <li>ESOP is an employee benefit</li> <li>May cause employees to think and act like owners</li> </ul>	<ul> <li>Complicated and expensive</li> <li>Requires securities registration exemption</li> <li>Company compelled to buy back shares from departing employees</li> <li>Generally suitable only for gradual exit over time</li> </ul>

#### SALE TO A THIRD PARTY

In a sale to a third party, an owner sells the business to a strategic buyer, financial buyer or private equity group through a negotiated sale, controlled auction or unsolicited offer.

PROS	CONS
<ul> <li>Higher price (highest of the options)</li> <li>More cash up front</li> <li>Walk away faster</li> <li>Stability of deal terms</li> <li>Business refresh (growth, new energy)</li> <li>Cost effective</li> <li>Breaks deadlock at management level with family</li> </ul>	<ul> <li>Long process (9-12 months)</li> <li>Distraction/loss of focus</li> <li>Privacy concerns</li> <li>Emotional for owners</li> <li>After sale tie-downs</li> <li>Highest absolute cost of options (but higher benefit)</li> <li>Complete - involves about 1,000 professional hours</li> <li>Can be difficult to close</li> </ul>

#### **RECAPITALIZATION/REFINANCE**

Recapitalization or refinancing involves finding new ways to "fund the company's balance sheet." This method essentially brings in a lender or equity investor to act as a partner in the business. An owner can sell minority or majority position.

PROS	CONS
<ul> <li>Allows partial exit</li> <li>Reduces owner risk <ul> <li>Diversifies asset</li> <li>concentration</li> </ul> </li> <li>Provides capital growth</li> <li>Second bite of the apple</li> <li>Works well with other exit options</li> </ul>	<ul> <li>Continuing accountability to partners (not a clean break)</li> <li>Loss of control</li> <li>Culture shift</li> <li>Slow transaction</li> <li>Expensive relative to benefit</li> </ul>

#### **ORDERLY LIQUIDATION**

In an orderly liquidation, the business is shut down through a simple, quick process. This option makes sense if asset values exceed the ability of the business to produce income required to support an investment

PROS	CONS
<ul> <li>Good option when the asset value exceeds the value of going concern</li> <li>Sum of the parts are greater than the whole (asset division produces value)</li> <li>Efficient way to exit</li> <li>May be less expensive than some of the other options</li> </ul>	<ul> <li>Uncertain proceeds (no guarantee)</li> <li>No money for goodwill</li> <li>Emotional (stigma?)</li> <li>Hard to predict costs</li> <li>Damage to employees/jobs</li> <li>Higher tax (C corporations)</li> </ul>
